

Communiqué, April 2016

**SOLAR-ERA.NET receives 39 preproposals with total project volume of 49 million euros in its fourth set of transnational calls in the field of solar power generation**

The fourth set of transnational SOLAR-ERA.NET calls PV4 and CSP4 found good interest in the solar power industry sector and research community. 39 preproposals with a total project volume of around 49 million euros and funding requested of around 35 million euros were submitted by the deadline set (11 April 2016). Preproposals involve 174 partners from 15 countries and regions (s. Figure 1).

56% of the organisations involved in the preproposals submitted belong to the categories of small and medium sized enterprises and large enterprises; research organizations have a share of 41%. Figure 2 shows the share of different types of organizations among the partners being involved in the preproposals submitted

31 out of 39 preproposals were submitted for PV topics, 8 preproposals for CSP topics. Figure 3 shows the number of preproposals submitted per call topic.

13 countries and regions participate with their RTD and innovation programmes in these calls. The total public funding budget for both calls is 10 million euros, covering topics in photovoltaics (PV) and concentrating solar power (CSP). Innovative project proposals are sought on transnational level between different European countries strengthening the competitive position of the European solar power industry.

The participating SOLAR-ERA.NET funding organisations will now check the eligibility of the preproposals submitted and their suitability for national funding. The preproposal assessment results will be communicated to the applicants by mid-June 2016. Applicants who pass this first stage will then be invited to submit a full proposal by 5 September 2016. Full proposals will then be evaluated and ranked by independent experts and funding organisations. First successful projects are expected to start end of early 2017.

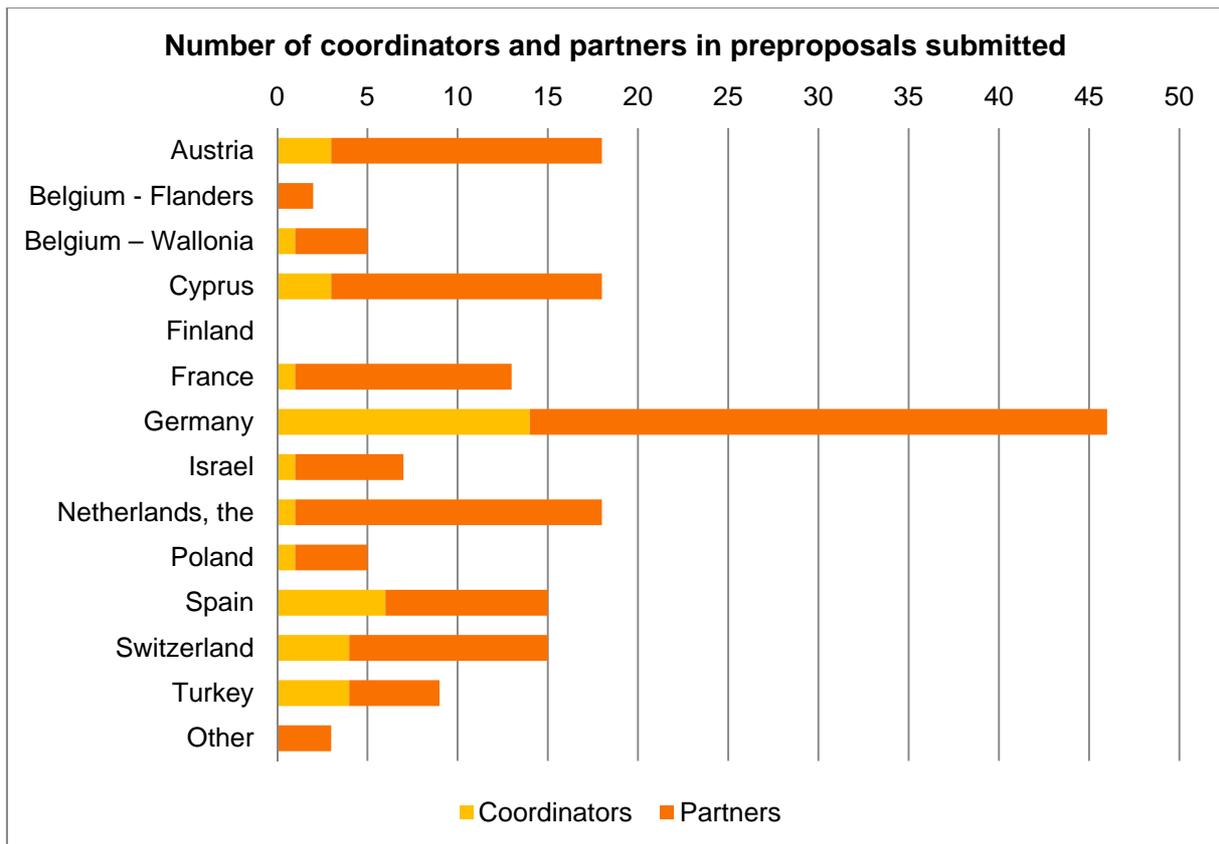

Figure 1: Number of coordinators and partners in the preproposals submitted by country / region participating in the fourth transnational SOLAR-ERA.NET calls PV4 and CSP4. Germany includes preproposals submitted to the regional agency of North-Rhine-Westphalia.

#### What is SOLAR-ERA.NET?

SOLAR-ERA.NET is a FP7 funded European network of national and regional funding organisations and RTD and innovation programmes in the field of solar electricity generation, i.e. photovoltaics (PV) and concentrating solar power (CSP) / solar thermal electricity (STE).

SOLAR-ERA.NET shall contribute to reaching the objectives of the Solar Europe Industry Initiative (SEII) by carrying out the coordination and support actions for the implementation of the SEII between national and regional RTD and innovation programmes.

The SEII is embedded in the European Strategic Energy Technology Plan (SET-Plan) which aims to increase, coordinate and focus EU support on key low-carbon energy technologies in order to achieve Europe's 2020 energy objectives in the future. The SEII is a joint initiative of the industry sector, EC and member states. The objective of the SEII is to boost the development of the PV and CSP sector beyond "business-as-usual" in the areas of Research and Development, Demonstration and Deployment. For the concerned solar electricity technologies Implementation Plans have been developed setting out priorities for RTD in Europe.

The goal of SOLAR-ERA.NET is to undertake joint strategic planning, programming and activities for RTD and innovation in the area of solar electricity generation. Joint activities, namely joint calls, are defined for key topics and priorities in accordance with the Solar Europe Industry Initiative (SEII). These transnational calls are part of these activities.
