

Communiqué, September 2015

21 full proposals with total project volume of 20 million euros submitted in the third set of transnational SOLAR-ERA.NET calls in the field of solar power generation

The third set of transnational SOLAR-ERA.NET calls PV3 and CSP3 found good interest in the solar power industry sector and research community. 21 full proposals (24 resp. 21 full proposals submitted in previous second resp. first joint call) with a total project volume of 20 million euros were submitted by the deadline set (8 September 2015).

94 potential project partners (122 resp. 114 potential project partners in the previous second resp. first joint call) can be counted from 16 different countries and regions. Figure 1 shows the number of coordinators and partners in the full proposals submitted by country / region participating in the SOLAR-ERA.NET call.

Almost half of the organisations involved in the full proposals submitted belong to the categories of small and medium sized enterprises and large enterprises; research organizations have a share of 52%. Figure 2 shows the share of different types of organizations among the partners being involved in the full proposals submitted.

Out of the 21 full proposals submitted, 18 were for PV topics and 3 for CSP topics. Figure 3 shows the number of full proposals submitted per call topic.

17 countries and regions participate with their RTD and innovation programmes in these calls. The total public funding budget for both calls is 12 million euros, covering topics in photovoltaics (PV) and concentrating solar power (CSP). Innovative project proposals are sought on transnational level between different European countries strengthening the competitive position of the European solar power industry.

The participating SOLAR-ERA.NET funding organisations will now (make) evaluate the full proposals submitted and their suitability for national funding. First successful proposals with positive funding decisions are supposed to start end of 2015 / early 2016.

SOLAR-ERA.NET is already preparing the fourth set of transnational SOLAR-ERA.NET calls in the field of solar power generation. This joint call is expected to be launched in December 2015. This joint call is also open for new countries and regions with their research and innovation programmes.

What is SOLAR-ERA.NET?

SOLAR-ERA.NET is a FP7 funded European network of national and regional funding organisations and RTD and innovation programmes in the field of solar electricity generation, i.e. photovoltaics (PV) and concentrating solar power (CSP) / solar thermal electricity (STE).

SOLAR-ERA.NET shall contribute to reaching the objectives of the Solar Europe Industry Initiative (SEII) by carrying out the coordination and support actions for the implementation of the SEII between national and regional RTD and innovation programmes.

The SEII is embedded in the European Strategic Energy Technology Plan (SET-Plan) which aims to increase, coordinate and focus EU support on key low-carbon energy technologies in order to achieve Europe's 2020 energy objectives in the future. The SEII is a joint initiative of the industry sector, EC and member states. The objective of the SEII is to boost the development of the PV and CSP sector beyond "business-as-usual" in the areas of Research and Development, Demonstration and Deployment. For the concerned solar electricity technologies Implementation Plans have been developed setting out priorities for RTD in Europe.

The goal of SOLAR-ERA.NET is to undertake joint strategic planning, programming and activities for RTD and innovation in the area of solar electricity generation. Joint activities, namely joint calls, are defined for key topics and priorities in accordance with the Solar Europe Industry Initiative (SEII). These transnational calls are part of these activities. Further countries and regions can participate in transnational calls with their research and innovation programmes.
